

Seize oil cooling integrated machine series

Customized energy-saving air compressors for the industry

It saves about **30%** power than ordinary air compressors

One design

Permanent magnet frequency conversion

Pressure customization

Intelligent energy-saving

Internet of Things

Low noise

Choosing an air compressor, Are you still troubled by these?

Spare parts not standardized,
quality too poor

High noise and vibration, high
moisture content

Instability, high failure, short life

Short warranty period

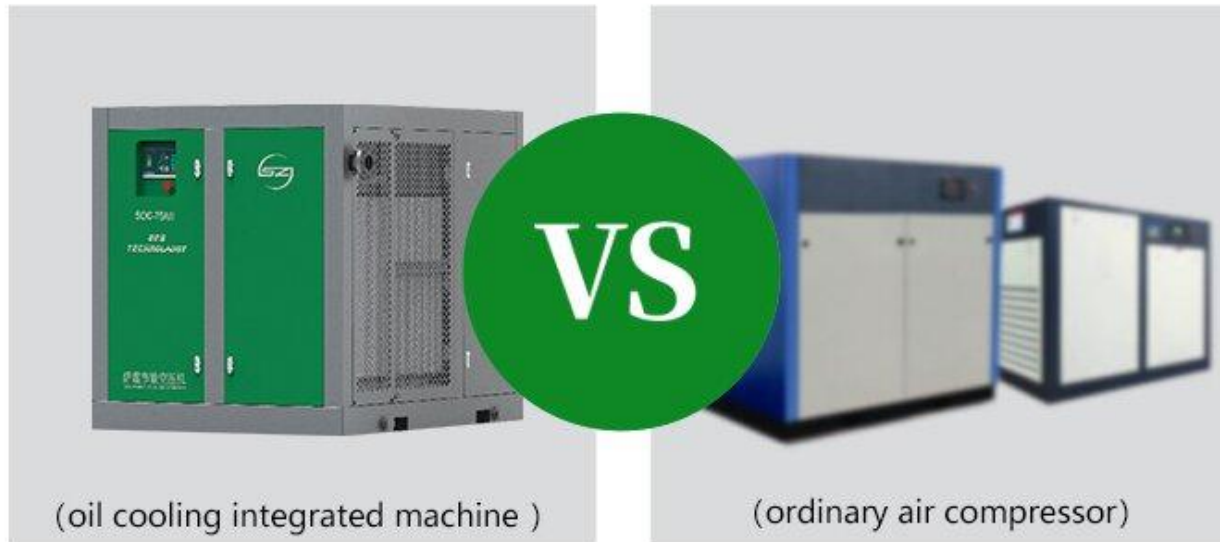

High oil content

Fewer service outlets

Seize oil cooling integrated machine **VS** ordinary air compressor

✓ Independent research and development, focus on energy saving

✓ 42 national patent certifications

✓ Factory direct sales, free selection and quotation

✓ Complete certification, reliable quality

✓ Assembly machine/OEM

✓ Incomplete series, limited choice

✓ Small scale and delayed after-sales

✓ Lots of middlemen

Product parameters

Brand model: SOC-75A-II

Rated pressure: 6.5-12.5kgf/cm²

Power: 75kw

Exhaust volume: 2.9-17.5m³/min

Cooling method: air cooling

Machine weight: 3500kg

Noise: 70db

Dimensions: 2000*1500*1670mm

3 energy-saving inventions
44 patent certificates

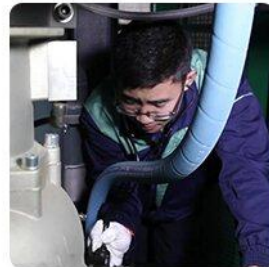

Test report • patent certificate

Professional after-sales service

239 technicians

3000 enterprise user service experience

客户见证

01

Saving 630,000 yuan in electricity bills per year

In textile industry
SV-132A-II *3

02

Savings 460,000 yuan in electricity bill a year

In food industry
SVF-185A-II

03

Saving 2,960,000yuan in electricity bills per year

In textile industry
SV-250A-II*5

04

Saving 630,000 yuan in electricity bills per year

In cement industry
SVC-90A-II*2
